

"Protecting What Moves"
"NEVER APPLY WAX AGAIN"

We have been introducing our products and PRISTINE DETAILING programs to Automotive, Watercraft & Aircraft Dealerships, Fleet accounts, Gas Stations, Malls, Private Owners and so much more for over 18 years.

Our products uses specially formulated NANO technology, fortified with Dupont Teflon® & Acrylic, which protect and bring longevity to finishes by chemically locking ultra fine particles of Teflon® into the finish(unlike other sealants, waxes, polishes or spray-ons) Our product will not breakdown at 70 degrees or by salts. Our protectors create a corrosion, oxidation and UV resistant shield that blocks harmful effects from the environment (see data research). Once the product is applied, test have shown an increase in speed due to the bonding of our sealants to the finish, as well as a protective coat to the surface. They also contain specially selected brighteners to accentuate and keep the finish shining and lustrous without ever having to **apply** wax again. All of our detailing is of the highest quality and are done by trained professionals, thus to insure the most PRISTINE level of detailing that you deserve.

"SCRATCH-CHIP & SCUFF REMOVAL"

ELITE TOUCH patented process makes scuffs, chips & fine to deep line scratches virtually invisible
Because our system is a spray less touch-up process (unlike others) we are environmentally friendly.

"HEADLIGHT RESTORATION"

BRIGHT VIEW process uses no chemicals harmful to the environment. This is the real deal; We warranty or work for life.

"CLEAR PAINT PROTECTION BRA"

To ultimately protect your front end & mirrors paint you need not to drive. We have solved that problem with a bra and it is 100% clear and fits like a glove. protect your expensive headlights from bug and other damages also.

Business Opportunities Available

SunGuard of South FLA, Inc. offers a unique opportunity in a **Multi Billion dollar** industry for individuals who are looking to be their own boss, have their own business and make as much money as they want. We are a company that offers a support & marketing team. - **Leather/Plastic Over Lays-Gold Plating**
- **SG Stay-NU Mat Protection**
- **SG Paint Thickness Readings**
- **Oil Changes and Tire Rotation**
- **SG PURE Carnauba wax(hand only)**

Bugs, rail dust, salt & waxes can destroy paint finishes; add protection with our "Platinum Plan"

THE REAL FACTS

	SunGuard paint protector	poly sealant, polymer, dri-wash & silicone	conventional glazes, wax & polishes
Frequency of Application	More apps, adds more protection & luster to surfaces.	Temporary, requires a rejuvenation schedule	Re-apply every 2 to 4 months to regain shine
Effects of Sun	Adheres to finish and protects paint from UV/gamma rays, etc...	Protection and gloss lose within 90 to 180 days	80-90 degree softens. break down 15-40 days. Car washes remove wax.
Effects of Pollution	Paint pores resealed, pollutants cannot penetrate painted surfaces	pores reopen pollutants penetrate & accelerate deterioration allows finish to crack, peel	No added protection to paint surface will destroy surface over time.
Effects of Salt	Does not affect the paint protector (see test data)	Top layers of paint unprotected, vulnerable to corrosion, special prep. needed	Monthly application required
Repainting problems	No special prep required.	Prep. required and paint may not hold, causing fish-eye and running problems	No special prep. required
Maintenance and up keep	rinse and wipe dry. Luster returns (can use special suds)	Road film clings to open pores, soap & rinse (water spots may occur), wipe dry.	No special prep. Water washes, waxes away.
Warranty	Written	No warranty	No warranty

REMEMBER: City, well & car wash water has chlorines, bleach, phosphates, calcium, lime &/or sulfur and other things that will damage your paint finish, windows, rims and headlights over a short amount of time.

WE ONLY USE FILTERED & SOFTENED WATER
